## DETAILED ACTION

### *Election/Restriction*

1. This application is a 371 of PCT/GB04/04850. For applications filed under 371, PCT rules for lack of unity apply.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains inventions or groups of inventions, which are not so linked as to form a single inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I. Claims 10-12, 19, drawn to a method of treatment of MS by administering a nucleic acid inhibitor of IL-17 activity.

Group II. Claims 10-12, 19, drawn to a method of prophylaxis of MS by administering a nucleic acid inhibitor of IL-17 activity.

Group III. Claims 10-11, 13-17, 19, drawn to a method of treatment of MS by administering an antibody to IL-17, which inhibits IL-17 activity.

Group IV. Claims 10-11, 13-17, 19, drawn to a method of prophylaxis of MS by administering an antibody to IL-17, which inhibits IL-17 activity.

Group V. Claims 10-11, 13-16, 18-19, drawn to a method of treatment of MS by administering an antibody to IL-17R, which inhibits IL-17 activity.

Group VI. Claims 10-11, 13-16, 18-19, drawn to a method of prophylaxis of MS by administering an antibody to IL-17R, which inhibits IL-17 activity.

Art Unit: 1646

NOTE: Independent claim 10 reads on nucleic acids and antibodies that are not related in structure and function.

NOTE: Applicants must choose a nucleic acid or antibody for examination. This is not a species election, but an election of a single invention.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because under PCT Rule 13.2 they lack the same or corresponding special technical feature for the following reasons:

The methods of Groups I-VI are patentably distinct from each other because each recites different patient populations, each method uses different starting materials to be administered and has different goals. For example, the method of Group I is distinct from the method of Group IV because of different patient populations to be treated, different products to be administered and different process steps. Furthermore, the search of all methods in one patent application would result in an undue search burden.

3. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1646

application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
